

CBSE 2027 Pe — Predicted Paper (Set 3 of 10)

SECTION A: Objective Type Questions (18 Marks: 18 x 1)

All questions are compulsory. Consists of MCQs and Assertion-Reason questions.

Q1. In a knock-out tournament of 21 teams, how many byes will be allocated in the lower half of the fixture? (A) 5 (B) 6 (C) 11 (D) 10 *Unit 1: Management of Sporting Events | Tag: Very High***

Q2. Sir Ludwig Guttman is known as the founder of which of the following games for people with disabilities? (A) Special Olympics (B) Deaflympics (C) Paralympics (D) Commonwealth Games *Unit 4: PE & Sports for CWSN | Tag: High***

Q3. The lateral curvature of the spine, where the spine bends sideways (C or S shape), is known as: (A) Kyphosis (B) Lordosis (C) Scoliosis (D) Flat Foot *Unit 2: Children & Women in Sports | Tag: Very High***

Q4. Which of the following vitamins fall under the category of water-soluble vitamins? (A) Vitamin A and D (B) Vitamin B and C (C) Vitamin E and K (D) Vitamin A and K *Unit 5: Sports & Nutrition | Tag: Very High***

Q5. In the SAI Khelo India Fitness Test for the 5-8 years age group, which test is used to measure static balance? (A) Plate Tapping Test (B) 50m Dash (C) Flamingo Balance Test (D) Partial Curl-up *Unit 6: Test and Measurement in Sports | Tag: High***

Q6. A type of bone fracture where the bone bends and cracks, instead of breaking completely into separate pieces, usually found in children, is called a: (A) Transverse Fracture (B) Comminuted Fracture (C) Greenstick Fracture (D) Impacted Fracture *Unit 7: Physiology & Injuries in Sport | Tag: Very High***

Q7. Which of the following factors does NOT affect the trajectory of a projectile in sports? (A) Angle of release (B) Air resistance (C) Muscle fiber composition (D) Initial velocity *Unit 8: Biomechanics and Sports | Tag: High***

Q8. When a sportsperson participates in a sport purely for self-satisfaction and the joy of the game, it is an example of: (A) Extrinsic Motivation (B) Intrinsic Motivation (C) Instrumental Motivation (D) Tangible Motivation *Unit 9: Psychology and Sports | Tag: Very High***

Q9. The longest training cycle in sports training, which can last anywhere from 3 to 12 months, is called: (A) Microcycle (B) Mesocycle (C) Macrocycle (D) Training Session *Unit 10: Training in Sports | Tag: High***

Q10. Which of the following asanas is highly recommended for the treatment and control of Diabetes? (A) Tadasana (B) Ardha Matsyendrasana (C) Halasana (D) Shavasana *Unit 3: Yoga as Preventive Measure | Tag: Very High***

Q11. The type of friction that comes into play when an object is just resting on a surface and not yet moving is known as: (A) Sliding friction (B) Rolling friction (C) Fluid friction (D) Static friction *Unit 8: Biomechanics and Sports | Tag: High***

Q12. Osteoporosis, a component of the Female Athlete Triad, is primarily characterized by: (A) Eating disorders (B) Absence of menstruation (C) Low bone mineral density (D) Iron deficiency
*Unit 2: Children & Women in Sports | Tag: Very High***

Q13. A tournament where a team gets eliminated after losing once, but the remaining teams play league matches in the next round, is an example of: (A) Challenge tournament (B) Knock-out cum League tournament (C) League cum League tournament (D) Single league tournament
*Unit 1: Management of Sporting Events | Tag: Medium***

Q14. The 'Chair Sit and Reach Test' in the Senior Citizen Fitness Test battery is designed to measure: (A) Lower body flexibility (B) Upper body flexibility (C) Cardiovascular endurance (D) Agility
*Unit 6: Test and Measurement in Sports | Tag: Very High***

Q15. Which muscle contraction is characterized by a visible change in the length of the muscle (either shortening or lengthening) while tension remains constant? (A) Isometric (B) Isotonic (C) Isokinetic (D) Static
*Unit 10: Training in Sports | Tag: High***

Q16. Assertion (A): Extramural tournaments provide opportunities to schools to show their sporting capabilities to other institutions. **Reason (R):** Extramural activities are those sports competitions which are organized outside the boundary walls of an institution. (A) Both (A) and (R) are true and (R) is the correct explanation of (A). (B) Both (A) and (R) are true, but (R) is not the correct explanation of (A). (C) (A) is true, but (R) is false. (D) (A) is false, but (R) is true.
*Unit 1: Management of Sporting Events | Tag: Very High***

Q17. Assertion (A): Flexibility naturally decreases in an individual with advancing age. **Reason (R):** Regular exercise can completely stop and reverse the physiological process of aging permanently. (A) Both (A) and (R) are true and (R) is the correct explanation of (A). (B) Both (A) and (R) are true, but (R) is not the correct explanation of (A). (C) (A) is true, but (R) is false. (D) (A) is false, but (R) is true.
*Unit 7: Physiology & Injuries in Sport | Tag: High***

Q18. Assertion (A): An athlete acting assertively uses legitimate physical force to achieve a goal without the intent to harm the opponent. **Reason (R):** Assertive behavior is synonymous with hostile aggression. (A) Both (A) and (R) are true and (R) is the correct explanation of (A). (B) Both (A) and (R) are true, but (R) is not the correct explanation of (A). (C) (A) is true, but (R) is false. (D) (A) is false, but (R) is true.
*Unit 9: Psychology and Sports | Tag: Medium***

SECTION B: Very Short Answer Type (10 Marks: Attempt any 5 out of 6 x 2)

Word limit: 60-90 words.

Q19. Write any two major objectives of organizing Extramural tournaments. *Unit 1: Management of Sporting Events | Tag: High***

Q20. Differentiate between Macronutrients and Micronutrients with one example of each. *Unit 5: Sports & Nutrition | Tag: Very High***

Q21. Briefly explain the procedure of the 'Sit and Reach Test' used to measure flexibility. *Unit 6: Test and Measurement in Sports | Tag: High***

Q22. Define 'Tidal Volume' and 'Residual Volume' in the context of the respiratory system.

*Unit 7: Physiology & Injuries in Sport | Tag: Medium***

Q23. What is the basic difference between Static Equilibrium and Dynamic Equilibrium in sports? *Unit 8: Biomechanics and Sports | Tag: Very High***

Q24. Differentiate between Intrinsic Motivation and Extrinsic Motivation. *Unit 9: Psychology and Sports | Tag: High***

SECTION C: Short Answer Type (15 Marks: Attempt any 5 out of 6 x 3)

Word limit: 100-150 words.

Q25. Explain the procedure and any two benefits of performing Tadasana. *Unit 3: Yoga as Preventive Measure | Tag: High***

Q26. Discuss the aims and objectives of the Paralympic Games. *Unit 4: PE & Sports for CWSN | Tag: Very High***

Q27. Explain any three common physiological changes that occur in the human body due to aging. *Unit 7: Physiology & Injuries in Sport | Tag: High***

Q28. Explain the different types of friction (Static, Sliding, and Rolling friction) giving suitable examples from sports. *Unit 8: Biomechanics and Sports | Tag: Very High***

Q29. Define Strength. Differentiate between Isometric, Isotonic, and Isokinetic exercises. *Unit 10: Training in Sports | Tag: Very High***

Q30. What do you mean by Scoliosis? Suggest any two corrective measures to rectify this deformity. *Unit 2: Children & Women in Sports | Tag: High***

SECTION D: Case-Study Based Questions (12 Marks: 3 x 4)

All 3 questions are compulsory. Internal choice is provided in one sub-part of each.

Q31. (Unit 1: Management of Sporting Events) A physical education teacher decides to organize an inter-house volleyball tournament on a league basis. Because time is limited and he wants to save costs, he opts for the Staircase Method of drawing the fixture for the 6 participating house teams. **(i)** How many total matches will be played in this tournament? **(ii)** Are there any byes awarded when making a fixture using the Staircase method? **(iii)** What is the main advantage of using the Staircase method for fixtures? **(iv)** Name the method used to decide the winner in a league tournament based on points. **OR** Write the formula to calculate the number of matches in a double league tournament.

Q32. (Unit 6: Test and Measurement in Sports) A primary school PE teacher is conducting a fitness assessment for students of Classes 1 to 3 (age group 5-8 years) under the SAI Khelo India Fitness Test guidelines to track their motor skill development early on. **(i)** Which specific test from this battery should the teacher use to measure the static balance of the young children? **(ii)** Which test is performed to measure the coordination and speed of the upper

limbs? **(iii)** To calculate a child's BMI, what two physical measurements must the teacher record? **(iv)** What does BMI stand for? **OR** Mention the duration of the Plate Tapping Test in seconds.

Q33. (Unit 9: Psychology and Sports) During a highly contested and heated hockey match, Team A is losing. A frustrated player from Team A intentionally strikes an opponent from Team B with his hockey stick. The strike was not meant to gain a tactical advantage or secure the ball, but purely out of anger to cause physical harm to the opponent. **(i)** Which specific type of aggression is demonstrated by the player from Team A? **(ii)** If a player uses physical force strictly to win the ball or score a goal without malice, what type of aggression is it? **(iii)** Does 'assertive behavior' involve the intent to cause physical harm to the opponent? **(iv)** What is the primary aim of Hostile Aggression? **OR** Mention any one psychological technique a coach can use to manage an athlete's aggression.

SECTION E: Long Answer Type (15 Marks: Attempt any 3 out of 4 x 5)

Word limit: 200-300 words.

Q34. Explain any five specific strategies that schools and communities can implement to make physical activities accessible and inclusive for Children With Special Needs (CWSN). *Unit 4: PE & Sports for CWSN | Tag: Very High***

Q35. Define Diabetes. Name any four yoga asanas that are beneficial for the prevention and control of diabetes. Explain the detailed procedure, health benefits, and contraindications of 'Ardha Matsyendrasana'. *(You may note where a stick diagram would be drawn). Unit 3: Yoga as Preventive Measure | Tag: High***

Q36. What do you understand by the term 'Projectile' in sports? Discuss in detail the various physical and mechanical factors (such as Angle of Release, Height of Release, Initial Velocity, Air Resistance, and Gravity) that affect the trajectory of a projectile, providing relevant sports examples. *Unit 8: Biomechanics and Sports | Tag: Very High***

Q37. What is a Balanced Diet? Elaborate on the functions and importance of any four Macro Nutrients (Carbohydrates, Proteins, Fats, Water) in an athlete's regular diet. *Unit 5: Sports & Nutrition | Tag: Very High***
