

CBSE 2027 Pe — Predicted Paper (Set 4 of 10)

SECTION A: Objective Type Questions (18 Marks: 18 x 1)

All questions are compulsory. Consists of MCQs and Assertion-Reason questions.

Q1. What is the formula for calculating the number of byes in the upper half of a knock-out fixture if the total number of teams (N) is odd? (A) $(N + 1) / 2$ (B) $(Nb - 1) / 2$ (C) $(Nb + 1) / 2$ (D) $(N - 1) / 2$ *Unit 1: Management of Sporting Events | Tag: Very High***

Q2. Which postural deformity is commonly known as "hollow back"? (A) Kyphosis (B) Lordosis (C) Scoliosis (D) Flat Foot *Unit 2: Children & Women in Sports | Tag: Very High***

Q3. Which of the following yoga asanas is translated as the "Cobra Pose"? (A) Bhujangasana (B) Gomukhasana (C) Halasana (D) Shavasana *Unit 3: Yoga as Preventive Measure | Tag: High***

Q4. The logo of the Deaflympics comprises how many distinct colors? (A) Three (B) Four (C) Five (D) Six *Unit 4: PE & Sports for CWSN | Tag: Medium***

Q5. Which essential mineral is primarily responsible for the formation of hemoglobin in the blood? (A) Calcium (B) Potassium (C) Iron (D) Phosphorus *Unit 5: Sports & Nutrition | Tag: Very High***

Q6. In the Rikli & Jones Senior Citizen Fitness Test, what is the weight of the dumbbell used for women in the Arm Curl Test? (A) 4 pounds (B) 5 pounds (C) 8 pounds (D) 10 pounds *Unit 6: Test and Measurement in Sports | Tag: High***

Q7. An injury characterized by an irregular tear of the skin, often caused by blunt trauma or a sharp object, is known as: (A) Laceration (B) Contusion (C) Abrasion (D) Incision *Unit 7: Physiology & Injuries in Sport | Tag: High***

Q8. A bicep curl exercise using a dumbbell is a classic anatomical example of which type of lever? (A) First-class lever (B) Second-class lever (C) Third-class lever (D) Both A and B *Unit 8: Biomechanics and Sports | Tag: Very High***

Q9. According to the Big Five Personality Theory, which trait describes a person who is friendly, compassionate, cooperative, and trustworthy? (A) Openness (B) Extroversion (C) Agreeableness (D) Neuroticism *Unit 9: Psychology and Sports | Tag: High***

Q10. The sports training method that is strictly based on the principle of 'effort and recovery' is: (A) Continuous Training (B) Fartlek Training (C) Interval Training (D) Circuit Training *Unit 10: Training in Sports | Tag: Very High***

Q11. The procedure by which strong and top-ranked teams are placed in fixtures in such a way that they do not meet each other in the very first round is called: (A) Bye (B) Seeding (C) Special Seeding (D) Wild Card *Unit 1: Management of Sporting Events | Tag: High***

Q12. A severe medical condition in female athletes characterized by extremely low bone mineral density and fragile bones is known as: (A) Amenorrhea (B) Osteoporosis (C) Anorexia Nervosa (D) Bulimia *Unit 2: Children & Women in Sports | Tag: Very High***

Q13. The 600m Run/Walk test from the SAI Khelo India battery is specifically used to measure: (A) Speed (B) Agility (C) Cardiovascular Endurance (D) Explosive Power *Unit 6: Test and Measurement in Sports | Tag: Very High***

Q14. The force of gravity acting on a gymnast's body during a handstand primarily dictates their: (A) Air resistance (B) Trajectory (C) Equilibrium and Stability (D) Acceleration *Unit 8: Biomechanics and Sports | Tag: Medium***

Q15. The coordinative ability that enables a sportsperson to maintain body posture both in static and dynamic conditions is called: (A) Orientation ability (B) Coupling ability (C) Balance ability (D) Reaction ability *Unit 10: Training in Sports | Tag: High***

Q16. Assertion (A): Regular weight training and physical exercise lead to muscular hypertrophy. **Reason (R):** Muscular hypertrophy refers to a decrease in the size of muscle fibers due to inactivity. (A) Both (A) and (R) are true and (R) is the correct explanation of (A). (B) Both (A) and (R) are true, but (R) is not the correct explanation of (A). (C) (A) is true, but (R) is false. (D) (A) is false, but (R) is true. *Unit 7: Physiology & Injuries in Sport | Tag: Very High***

Q17. Assertion (A): Water is considered a crucial non-nutritive component of our diet. **Reason (R):** Water provides zero calories to the human body but is absolutely essential for hydration, digestion, and metabolic functions. (A) Both (A) and (R) are true and (R) is the correct explanation of (A). (B) Both (A) and (R) are true, but (R) is not the correct explanation of (A). (C) (A) is true, but (R) is false. (D) (A) is false, but (R) is true. *Unit 5: Sports & Nutrition | Tag: High***

Q18. Assertion (A): Kapalabhati is highly recommended as a safe breathing exercise for individuals suffering from severe hypertension. **Reason (R):** Kapalabhati involves rapid and forceful exhalations which can temporarily spike blood pressure levels. (A) Both (A) and (R) are true and (R) is the correct explanation of (A). (B) Both (A) and (R) are true, but (R) is not the correct explanation of (A). (C) (A) is true, but (R) is false. (D) (A) is false, but (R) is true. *Unit 3: Yoga as Preventive Measure | Tag: Medium***

SECTION B: Very Short Answer Type (10 Marks: Attempt any 5 out of 6 x 2)

Word limit: 60-90 words.

Q19. Differentiate between a 'Bye' and a 'Seed' in a knock-out tournament fixture. *Unit 1: Management of Sporting Events | Tag: Very High***

Q20. Mention any two common causes of 'Lordosis' and suggest any two corrective physical exercises for it. *Unit 2: Children & Women in Sports | Tag: High***

Q21. Enlist any four major sources of proteins in a balanced diet. *Unit 5: Sports & Nutrition | Tag: Medium***

Q22. State the primary purpose and the equipment required to conduct the 'Plate Tapping Test' under the SAI Khelo India protocol. *Unit 6: Test and Measurement in Sports | Tag: High***

Q23. Define 'Centre of Gravity'. State its importance in maintaining stability in sports. *Unit 8: Biomechanics and Sports | Tag: Very High***

Q24. What is meant by 'Self-Talk' in sports psychology? Mention any two of its benefits for athletes. *Unit 9: Psychology and Sports | Tag: High***

SECTION C: Short Answer Type (15 Marks: Attempt any 5 out of 6 x 3)

Word limit: 100-150 words.

Q25. Explain the Cyclic Method of drawing a league fixture. Draw a clear fixture for 5 teams using this method. *Unit 1: Management of Sporting Events | Tag: Very High***

Q26. Briefly explain the step-by-step procedure of performing Bhujangasana. List any two contraindications. *Unit 3: Yoga as Preventive Measure | Tag: High***

Q27. What is the concept of 'Inclusive Education' in physical education? Briefly explain the need to implement inclusive strategies for CWSN. *Unit 4: PE & Sports for CWSN | Tag: Very High***

Q28. Highlight any three short-term physiological effects of rigorous exercise on the cardiorespiratory system. *Unit 7: Physiology & Injuries in Sport | Tag: High***

Q29. Explain the concepts of 'Mental Imagery' and 'Self-Esteem' as critical psychological attributes in sports. *Unit 9: Psychology and Sports | Tag: Medium***

Q30. Define Speed. Differentiate clearly between 'Pace Runs' and 'Acceleration Runs' used for speed development. *Unit 10: Training in Sports | Tag: Very High***

SECTION D: Case-Study Based Questions (12 Marks: 3 x 4)

All 3 questions are compulsory. Internal choice is provided in one sub-part of each.

Q31. (Unit 6: Test and Measurement in Sports) A physical education teacher is conducting a cardiovascular fitness assessment for the school's teaching staff (above 30 years old) to encourage a healthy lifestyle. He marks a 400m track, asks the participants to walk a distance of 1-mile as fast as possible, and immediately records their post-walk heart rate and completion time. **(i)** Which specific fitness test is the teacher administering to the staff? **(ii)** What is the primary physical fitness component being measured by this test? **(iii)** What basic equipment is minimally required to conduct this test? **(iv)** What does $\dot{V}O_2$ Max signify in fitness testing? **OR** In the formula used to calculate $\dot{V}O_2$ Max for this specific walk test, the participant's body weight must be recorded in which unit?

Q32. (Unit 7: Physiology & Injuries in Sport) During a high-intensity inter-house rugby match, two players collide mid-air and fall to the ground. Player A falls awkwardly on his arm, and an X-ray later reveals his bone has broken diagonally across the shaft. Player B, a junior student, suffers an injury to his collarbone, which the doctor notes has merely bent and slightly cracked but hasn't broken into two separate pieces. **(i)** The diagonal break in Player

A's bone is an example of which specific type of fracture? **(ii)** The incomplete break where Player B's bone has bent and slightly cracked is known as a __ fracture. **(iii)** Why is the type of fracture suffered by Player B most commonly seen in young children? **(iv)** Define a 'Comminuted fracture'. **OR** What is the very first immediate first-aid step (before hospital transport) that should be taken for a suspected bone fracture on the field?

Q33. (Unit 9: Psychology and Sports) Rajesh is a highly skilled state-level swimmer, but lately, his coach has noticed a severe drop in his lap timings and a lack of interest during training due to burnout. Realizing Rajesh needs a mental boost, the coach sets specific, timed goals for him. The coach also promises Rajesh that if he meets these target timings, he will be appointed as the captain of the school swimming team for the upcoming nationals. **(i)** Promising the team captaincy to Rajesh as a reward is an example of which type of motivation? **(ii)** When an athlete participates in a sport purely for internal joy, passion, and personal satisfaction, what kind of motivation is it? **(iii)** In the context of Goal Setting, what does the letter 'M' stand for in the SMART goal principle? **(iv)** What is 'Motivation'? **OR** Suggest one additional psychological technique the coach can use to enhance Rajesh's performance.

SECTION E: Long Answer Type (15 Marks: Attempt any 3 out of 4 x 5)

Word limit: 200-300 words.

Q34. What is a League Tournament? Discuss in detail any three major advantages and any two disadvantages of organizing a league tournament. *Unit 1: Management of Sporting Events* | Tag: High**

Q35. A collaborative approach is vital to helping Children with Special Needs (CWSN) integrate effectively. Elaborate on the specific roles and responsibilities of the following professionals for CWSN: (a) School Counselor (b) Physiotherapist (c) Occupational Therapist (d) Physical Education Teacher (e) Speech Therapist *Unit 4: PE & Sports for CWSN* | Tag: Very High**

Q36. Regular training profoundly impacts the human body. Explain any five long-term physiological changes that occur in the Muscular System due to continuous and regular exercise. *Unit 7: Physiology & Injuries in Sport* | Tag: Very High**

Q37. What do you understand by the term 'Equilibrium' in sports? Discuss the types of equilibrium (Static and Dynamic) and explain the key principles of stability that help an athlete maintain balance, giving suitable examples from different sports. *Unit 8: Biomechanics and Sports* | Tag: High**
