

CBSE 2027 Pe — Predicted Paper (Set 6 of 10)

SECTION A: Objective Type Questions (18 Marks: 18 x 1)

All questions are compulsory. Consists of MCQs and Assertion-Reason questions.

Q1. Which formula is used to calculate the number of rounds in a single knock-out tournament if the total number of participating teams is exactly a power of 2 (e.g., 8, 16, 32)?
(A) $N - 1$ (B) $N \times 2$ (C) It is equal to the power of 2 (e.g., $2^3 = 3$ rounds) (D) $N(N-1)/2$ *Unit 1:*

*Management of Sporting Events | Tag: High***

Q2. The tournament which is played to provide a second chance to the teams that were defeated in the early rounds of a knock-out tournament is known as: (A) Double League Tournament (B) Consolation Tournament (C) Challenge Tournament (D) Ladder Tournament
*Unit 1: Management of Sporting Events | Tag: Medium***

Q3. Which essential macro-mineral is vitally required for the formation and strengthening of bones and teeth in the human body? (A) Sodium (B) Phosphorus (C) Calcium (D) Both B and C
*Unit 5: Sports & Nutrition | Tag: Very High***

Q4. The condition in which airways narrow, swell, and produce extra mucus, making breathing difficult, is called: (A) Hypertension (B) Asthma (C) Diabetes (D) Obesity *Unit 3: Yoga as Preventive Measure | Tag: Very High***

Q5. In the SAI Khelo India Fitness Test battery, the 'Partial Curl-Up' test is specifically administered to measure: (A) Upper body strength (B) Core/Abdominal strength and endurance (C) Lower body flexibility (D) Cardiovascular endurance *Unit 6: Test and Measurement in Sports | Tag: Very High***

Q6. The abbreviation 'ODD' in the context of psychological disorders stands for: (A) Oppositional Defiant Disorder (B) Obsessive Defiant Disorder (C) Oppositional Different Disorder (D) Obsessive Defective Disorder *Unit 4: PE & Sports for CWSN | Tag: Very High***

Q7. The amount of blood pumped by the left ventricle of the heart in one minute is called: (A) Stroke Volume (B) Cardiac Output (C) Tidal Volume (D) Heart Rate *Unit 7: Physiology & Injuries in Sport | Tag: High***

Q8. Newton's Third Law of Motion, which states that for every action there is an equal and opposite reaction, is also known as: (A) Law of Inertia (B) Law of Acceleration (C) Law of Reaction (D) Law of Momentum *Unit 8: Biomechanics and Sports | Tag: Very High***

Q9. Which of the following is NOT classified as a 'Coordinative Ability' in sports training? (A) Coupling ability (B) Reaction ability (C) Maximum strength (D) Differentiation ability *Unit 10: Training in Sports | Tag: High***

Q10. The excessive loss of water from body tissues, often caused by heavy sweating during prolonged sports activities without adequate fluid replacement, is called: (A) Hydration (B) Dehydration (C) Malnutrition (D) Anorexia *Unit 5: Sports & Nutrition | Tag: High***

Q11. To calculate an individual's Body Mass Index (BMI), which mathematical formula is used? (A) Weight (in kg) / Height (in meters) (B) Weight (in kg) / Height squared (m^2) (C) Height (in meters) / Weight (in kg) (D) Height squared (m^2) / Weight (in kg) *Unit 5: Sports & Nutrition | Tag: Very High***

Q12. The postural deformity 'Flat Foot' is most commonly caused by: (A) Wearing poorly fitted or completely flat shoes (B) Lack of vitamin C (C) Overstretching the neck muscles (D) Congenital hearing loss *Unit 2: Children & Women in Sports | Tag: High***

Q13. In which stage of a child's growth does fine motor development (coordination of small muscles, like hands and fingers) rapidly begin to improve? (A) Infancy (B) Early Childhood (C) Late Childhood (D) Adulthood *Unit 2: Children & Women in Sports | Tag: Medium***

Q14. The type of friction acting upon a swimmer moving through water or a skydiver falling through the air is known as: (A) Static friction (B) Sliding friction (C) Rolling friction (D) Fluid friction *Unit 8: Biomechanics and Sports | Tag: Very High***

Q15. The psychological technique where an athlete visualizes themselves successfully executing a skill or winning a match in their mind before it actually happens is called: (A) Goal Setting (B) Self-Talk (C) Mental Imagery (D) Extrinsic Motivation *Unit 9: Psychology and Sports | Tag: High***

Q16. Assertion (A): Anorexia Nervosa is an eating disorder characterized by extreme food restriction and an intense fear of gaining weight. **Reason (R):** Anorexia Nervosa is one of the three core components of the Female Athlete Triad. (A) Both (A) and (R) are true and (R) is the correct explanation of (A). (B) Both (A) and (R) are true, but (R) is not the correct explanation of (A). (C) (A) is true, but (R) is false. (D) (A) is false, but (R) is true. *Unit 2: Children & Women in Sports | Tag: High***

Q17. Assertion (A): Newton's Second Law of Motion (Law of Acceleration) is heavily applied in the sport of Shot Put. **Reason (R):** The greater the force applied by the athlete to the shot, the greater the acceleration and distance it will cover. (A) Both (A) and (R) are true and (R) is the correct explanation of (A). (B) Both (A) and (R) are true, but (R) is not the correct explanation of (A). (C) (A) is true, but (R) is false. (D) (A) is false, but (R) is true. *Unit 8: Biomechanics and Sports | Tag: Very High***

Q18. Assertion (A): Intramural tournaments mean competitions conducted 'within the walls' of a single institution. **Reason (R):** The main objective of intramural tournaments is to identify the best school team in the state to compete against other schools. (A) Both (A) and (R) are true and (R) is the correct explanation of (A). (B) Both (A) and (R) are true, but (R) is not the correct explanation of (A). (C) (A) is true, but (R) is false. (D) (A) is false, but (R) is true. *Unit 1: Management of Sporting Events | Tag: Very High***

SECTION B: Very Short Answer Type (10 Marks: Attempt any 5 out of 6 x 2)

Word limit: 60-90 words.

- Q19.** Explain the concept of a 'Run for Fun' and state its primary objective. *Unit 1: Management of Sporting Events | Tag: High***
- Q20.** What do you understand by the term 'Menarche'? How does it relate to the biological development of female athletes? *Unit 2: Children & Women in Sports | Tag: High***
- Q21.** List any two major causes of 'Osteoporosis' in women. *Unit 2: Children & Women in Sports | Tag: Very High***
- Q22.** What is the 'Rockport One-Mile Walk Test' used to measure? State the essential equipment required to conduct this test. *Unit 6: Test and Measurement in Sports | Tag: High***
- Q23.** Define 'Kinematics' in the context of biomechanics in sports. *Unit 8: Biomechanics and Sports | Tag: Medium***
- Q24.** Briefly explain the 'Coupling ability' as a coordinative ability in sports, giving one example. *Unit 10: Training in Sports | Tag: High***
-

SECTION C: Short Answer Type (15 Marks: Attempt any 5 out of 6 x 3)

Word limit: 100-150 words.

- Q25.** Differentiate clearly between Intramural and Extramural competitions by providing any three distinct points of comparison. *Unit 1: Management of Sporting Events | Tag: Very High***
- Q26.** State the procedure of performing 'Matsyasana' (Fish Pose) and mention any two of its benefits. *Unit 3: Yoga as Preventive Measure | Tag: High***
- Q27.** Discuss any three key physiological factors that determine the 'Flexibility' of a sportsperson. *Unit 7: Physiology & Injuries in Sport | Tag: Very High***
- Q28.** Despite immense potential, women's participation in sports faces hurdles. Suggest any three effective strategies to enhance women's participation in sports in India. *Unit 2: Children & Women in Sports | Tag: High***
- Q29.** What is meant by 'Goal Setting' in sports psychology? Differentiate between short-term and long-term goals. *Unit 9: Psychology and Sports | Tag: Medium***
- Q30.** Discuss the practical application of Newton's First Law (Inertia) and Third Law (Reaction) in sports, providing one specific example for each. *Unit 8: Biomechanics and Sports | Tag: Very High***
-

SECTION D: Case-Study Based Questions (12 Marks: 3 x 4)

All 3 questions are compulsory. Internal choice is provided in one sub-part of each.

- Q31. (Unit 5 & 6: Sports Nutrition / Test & Measurement)** During an annual health check-up camp at a senior secondary school, the PE teacher recorded the height and weight of 50 students from Class 12. Upon calculating their Body Mass Index (BMI), he found that 15 students fell into the 'Overweight' category. He organized a counseling session to advise

them on nutrition and weight management. **(i)** What mathematical formula did the PE teacher use to calculate the BMI of the students? **(ii)** According to WHO criteria, what is the BMI score range for an individual to be categorized as 'Overweight'? **(iii)** State any one major health risk associated with having an abnormally high BMI. **(iv)** Which specific macronutrient should the PE teacher advise the overweight students to significantly reduce in their diet for effective weight loss? **OR** Name any two "Pitfalls of Dieting" the students should avoid while trying to lose weight.

Q32. (Unit 4: PE & Sports for CWSN) Raj is an 11-year-old boy diagnosed with Down Syndrome, an intellectual disability. His parents want him to engage in sports to improve his physical fitness and social skills. They approach a specialized coach who introduces Raj to a global movement that organizes sports training and athletic competition exclusively for children and adults with intellectual disabilities. **(i)** Name the specific international organization/movement the coach introduced Raj to. **(ii)** What is the minimum age requirement for an athlete to officially participate in the sports competitions hosted by this organization? **(iii)** What is the famous oath taken by athletes participating in this organization's games? **(iv)** The process of categorizing athletes of similar abilities into groups for fair competition in adaptive sports is known as _____. **OR** State any one benefit Raj will gain by participating in these adaptive sports.

Q33. (Unit 7: Physiology & Injuries in Sport) A comparative study was conducted between a trained marathon runner and an untrained individual of the same age. It was observed that the trained athlete's resting heart rate was significantly lower (around 50 beats per minute) compared to the untrained individual (72 beats per minute). Furthermore, after a heavy workout, the athlete's heart rate returned to normal much faster. **(i)** The lower resting heart rate observed in the highly trained athlete is physiologically known as _____. **(ii)** What is 'Stroke Volume' in the context of the cardiovascular system? **(iii)** Define 'Cardiac Output'. **(iv)** Does regular endurance training typically increase or decrease the size and strength of the heart muscle? **OR** What term is used to describe the increase in the size of the heart muscle due to long-term exercise?

SECTION E: Long Answer Type (15 Marks: Attempt any 3 out of 4 x 5)

Word limit: 200-300 words.

Q34. Regular exercise has a profound impact on the human body over time. Detail any five long-term physiological changes that occur specifically in the **Cardiorespiratory System** due to sustained physical training. *Unit 7: Physiology & Injuries in Sport | Tag: Very High***

Q35. Aggression is a common behavioral trait observed on the sports field. Define Aggression. Classify and explain the three main types of aggression (Hostile Aggression, Instrumental Aggression, and Assertive Behavior) with appropriate examples from sports. *Unit 9: Psychology and Sports | Tag: Very High***

Q36. What is the Rikli and Jones Senior Citizen Fitness Test? Detail the administration, procedure, and scoring system of the **Back Scratch Test** (for upper body flexibility) and the **6-Minute Walk Test** (for cardiovascular endurance). *Unit 6: Test and Measurement in Sports | Tag: High***

Q37. What do you understand by the term 'Balanced Diet'? Elaborate comprehensively on the specific roles, functions, and food sources of any two **Micro-Nutrients** (Vitamins and Minerals) essential for an athlete's performance. *Unit 5: Sports & Nutrition | Tag: Very High***
