

CBSE 2027 Pe — Predicted Paper (Set 7 of 10)

SECTION A: Objective Type Questions (18 Marks: 18 x 1)

All questions are compulsory. Consists of MCQs and Assertion-Reason questions.

Q1. What is the formula to calculate the total number of matches in a double league tournament? (A) $N(N - 1) / 2$ (B) $N(N - 1)$ (C) $N - 1$ (D) $N + 1$ *Unit 1: Management of Sporting Events | Tag: Very High***

Q2. The oath: "Let me win. But if I cannot win, let me be brave in the attempt" is associated with which of the following organizations? (A) Paralympics (B) Deaflympics (C) Special Olympics (D) Commonwealth Games *Unit 4: PE & Sports for CWSN | Tag: High***

Q3. According to the World Health Organization (WHO), what is the recommended duration of moderate-to-vigorous physical activity for children aged 5-17 years? (A) At least 30 minutes a day (B) At least 60 minutes a day (C) At least 90 minutes a day (D) 150 minutes a week *Unit 2: Children & Women in Sports | Tag: High***

Q4. The word 'Yoga' is derived from the Sanskrit root word: (A) Yug (B) Yuj (C) Yog (D) Yanj *Unit 3: Yoga as Preventive Measure | Tag: Medium***

Q5. Which of the following water-soluble vitamins is crucial for preventing the disease Beri-Beri? (A) Vitamin C (Ascorbic Acid) (B) Vitamin B1 (Thiamine) (C) Vitamin B3 (Niacin) (D) Vitamin B12 (Cobalamin) *Unit 5: Sports & Nutrition | Tag: Very High***

Q6. In the SAI Khelo India Fitness Test battery, what does the Flamingo Balance Test measure? (A) Dynamic Balance (B) Explosive Power (C) Static Balance (D) Coordination *Unit 6: Test and Measurement in Sports | Tag: Very High***

Q7. The accumulation of which substance in the muscles during rigorous anaerobic exercise primarily leads to muscular fatigue? (A) Amino acids (B) Glycogen (C) Lactic acid (D) Adenosine Triphosphate (ATP) *Unit 7: Physiology & Injuries in Sport | Tag: High***

Q8. A seesaw in a playground is a classic example of which type of lever? (A) First-class lever (B) Second-class lever (C) Third-class lever (D) None of the above *Unit 8: Biomechanics and Sports | Tag: Very High***

Q9. According to the Big Five Personality Theory, which trait is characterized by a person being highly organized, dependable, disciplined, and goal-oriented? (A) Extroversion (B) Agreeableness (C) Conscientiousness (D) Openness *Unit 9: Psychology and Sports | Tag: High***

Q10. Pace runs and acceleration sprints are training methods primarily used to develop which physical fitness component? (A) Flexibility (B) Strength (C) Speed (D) Coordinative abilities *Unit 10: Training in Sports | Tag: Very High***

Q11. In a knockout tournament of 13 teams, how many total byes will be given in the fixture? (A) 2 (B) 3 (C) 4 (D) 1 *Unit 1: Management of Sporting Events | Tag: Very High***

Q12. Which postural deformity is characterized by an abnormal lateral (sideways) curvature of the spine, usually resembling a "C" or "S" shape? (A) Kyphosis (B) Lordosis (C) Scoliosis (D) Bow Legs *Unit 2: Children & Women in Sports | Tag: Very High***

Q13. Which of the following minerals is classified as a Macro-mineral? (A) Iron (B) Iodine (C) Calcium (D) Copper *Unit 5: Sports & Nutrition | Tag: High***

Q14. In the Rikli & Jones Senior Citizen Fitness Test, which test is specifically designed to assess aerobic fitness or cardiovascular endurance? (A) 8-Foot Up and Go Test (B) 6-Minute Walk Test (C) Chair Stand Test (D) Back Scratch Test *Unit 6: Test and Measurement in Sports | Tag: Very High***

Q15. The maximum volume of air that can be exhaled forcibly after a maximum inhalation is known as: (A) Tidal Volume (B) Minute Volume (C) Vital Capacity (D) Residual Volume *Unit 7: Physiology & Injuries in Sport | Tag: Medium***

Q16. Assertion (A): Friction is often considered a "necessary evil" in sports. **Reason (R):** While friction can slow down athletes and cause wear and tear, it is absolutely essential for generating grip, such as a runner wearing spiked shoes to prevent slipping. (A) Both (A) and (R) are true and (R) is the correct explanation of (A). (B) Both (A) and (R) are true, but (R) is not the correct explanation of (A). (C) (A) is true, but (R) is false. (D) (A) is false, but (R) is true. *Unit 8: Biomechanics and Sports | Tag: Very High***

Q17. Assertion (A): Fartlek training is an excellent method for developing both aerobic and anaerobic endurance. **Reason (R):** Fartlek training is highly structured, involving fixed distances and exact, pre-planned resting periods monitored by a stopwatch. (A) Both (A) and (R) are true and (R) is the correct explanation of (A). (B) Both (A) and (R) are true, but (R) is not the correct explanation of (A). (C) (A) is true, but (R) is false. (D) (A) is true, but (R) is false. *(Note: Reason is false because Fartlek is unstructured and relies on natural terrain/athlete's feel).* *Unit 10: Training in Sports | Tag: High***

Q18. Assertion (A): Inclusive education mandates that Children with Special Needs (CWSN) should strictly be taught in isolated, special schools away from regular students. **Reason (R):** The core philosophy of inclusion promotes equity, social integration, and equal opportunities for all students in the same educational environment. (A) Both (A) and (R) are true and (R) is the correct explanation of (A). (B) Both (A) and (R) are true, but (R) is not the correct explanation of (A). (C) (A) is true, but (R) is false. (D) (A) is false, but (R) is true. *Unit 4: PE & Sports for CWSN | Tag: High***

SECTION B: Very Short Answer Type (10 Marks: Attempt any 5 out of 6 x 2)

Word limit: 60-90 words.

Q19. Briefly explain the concept of a 'Consolation Tournament'. *Unit 1: Management of Sporting Events | Tag: Medium***

Q20. Mention any two contraindications (who should avoid it) of performing Halasana. *Unit 3: Yoga as Preventive Measure | Tag: High***

- Q21.** Differentiate between Simple Carbohydrates and Complex Carbohydrates by giving one example of each. *Unit 5: Sports & Nutrition | Tag: Very High***
- Q22.** List the equipment required to conduct the '50m Dash' test under the SAI Khelo India protocol. *Unit 6: Test and Measurement in Sports | Tag: High***
- Q23.** State any two physiological differences between slow-twitch (Type I) and fast-twitch (Type II) muscle fibers. *Unit 7: Physiology & Injuries in Sport | Tag: Very High***
- Q24.** Mention any two effective techniques of motivation used by coaches to enhance sports performance. *Unit 9: Psychology and Sports | Tag: High***
-

SECTION C: Short Answer Type (15 Marks: Attempt any 5 out of 6 x 3)

Word limit: 100-150 words.

- Q25.** Draw a neat knock-out fixture for 7 teams, clearly showing the calculation for byes and the number of matches. *Unit 1: Management of Sporting Events | Tag: Very High***
- Q26.** State the physical activity guidelines recommended by the WHO for adults (18-64 years of age). *Unit 2: Children & Women in Sports | Tag: Medium***
- Q27.** Highlight any three specific strategies to make physical activities and sports accessible for Children with Special Needs (CWSN). *Unit 4: PE & Sports for CWSN | Tag: Very High***
- Q28.** Differentiate between Dynamic Equilibrium and Static Equilibrium. Provide one example of each from the field of sports. *Unit 8: Biomechanics and Sports | Tag: Very High***
- Q29.** What is the significance of 'Goal Setting' in sports psychology? Briefly explain the SMART principle of goal setting. *Unit 9: Psychology and Sports | Tag: High***
- Q30.** Define Isokinetic exercise. How does it fundamentally differ from Isotonic exercise? Provide one example. *Unit 10: Training in Sports | Tag: High***
-

SECTION D: Case-Study Based Questions (12 Marks: 3 x 4)

All 3 questions are compulsory. Internal choice is provided in one sub-part of each.

Q31. (Unit 2: Children & Women in Sports) During a routine physical check-up at school, the PE teacher observes that a Class 5 student stands with her knees touching each other while her feet are wide apart. She frequently complains of pain in her legs after running and has difficulty maintaining balance during sports activities. The teacher recommends a diet rich in Vitamin D and Calcium and suggests practicing specific yoga asanas like Padmasana. **(i)** Identify the specific postural deformity the student is suffering from. **(ii)** Name the postural deformity which is exactly the opposite of the one identified above. **(iii)** A deficiency of Vitamin D and Calcium often leads to which bone-weakening disease in children that causes this deformity? **(iv)** Name any one physical exercise (other than yoga) that acts as a corrective measure for this deformity. **OR** Which yoga asana is considered highly effective for correcting this specific deformity?

Q32. (Unit 3: Yoga as Preventive Measure) Ram's grandfather recently suffered from a mild heart flutter. Upon consultation, the doctor diagnosed him with high blood pressure, caused by a sedentary lifestyle and poor dietary habits. The doctor firmly advised him to stop taking excessive stress and practice meditation. A yoga expert recommended he perform *Tadasana* for postural alignment and *Shavasana* daily to calm his nervous system. (i) What is the medical term for the lifestyle disease characterized by consistently high blood pressure? (ii) *Shavasana* is highly effective for relaxation. In which bodily position (standing, sitting, or lying) is this asana performed? (iii) Name the yoga asana famously known as the "Palm Tree Pose" that was recommended to the grandfather. (iv) Write any one contraindication for performing *Tadasana*. **OR** Name one other lifestyle disease that yoga helps prevent, which involves narrowing of the airways and difficulty breathing.

Q33. (Unit 8: Biomechanics and Sports) At the start of a 100m sprint, Usain forcefully pushes his feet backward against the starting blocks. Instantly, the blocks push him forward with an equal magnitude of force, propelling him down the track. As he reaches his top speed, he tries to maintain a low posture to keep his body's weight perfectly balanced around a central point, preventing him from tumbling over at high velocity. (i) The interaction between the sprinter's feet and the starting blocks is an application of which of Newton's Laws of Motion? (ii) The imaginary central point around which the athlete's entire body weight is evenly balanced is known as the __. (iii) Newton's First Law of Motion is also commonly referred to as the Law of __. (iv) What type of friction exists between the sole of the sprinter's spiked shoes and the synthetic track as he pushes off? **OR** Define 'Acceleration' in the context of Newton's Second Law.

SECTION E: Long Answer Type (15 Marks: Attempt any 3 out of 4 x 5)

Word limit: 200-300 words.

Q34. What do you mean by a League Tournament? Detail the step-by-step procedure of drawing a league fixture using the **Tabular Method** for 6 participating teams. *Unit 1: Management of Sporting Events | Tag: High***

Q35. Explain the purpose of the **Rikli and Jones Senior Citizen Fitness Test**. List all six test items included in this battery and describe the detailed administration, procedure, and scoring of the 'Chair Stand Test' and the '8-Foot Up and Go Test'. *Unit 6: Test and Measurement in Sports | Tag: Very High***

Q36. Injuries are an inseparable part of sports. Define Soft Tissue Injuries. Classify and thoroughly explain any four types of soft tissue injuries (such as Sprain, Strain, Contusion, Laceration, or Abrasion) along with their immediate first-aid management. *Unit 7: Physiology & Injuries in Sport | Tag: Very High***

Q37. Define Flexibility as a component of physical fitness. Differentiate between Active and Passive flexibility. Furthermore, explain the various training methods (Slow Stretching,

Ballistic Method, and PNF technique) used by athletes to develop flexibility. *Unit 10: Training in Sports* | *Tag: Very High***
