

CBSE 2027 Pe — Predicted Paper (Set 8 of 10)

SECTION A: Objective Type Questions (18 Marks: 18 x 1)

All questions are compulsory. Consists of MCQs and Assertion-Reason questions.

Q1. What is the formula to calculate the total number of matches in a knock-out tournament? (A) $N + 1$ (B) $N(N - 1)$ (C) $N / 2$ (D) $N - 1$ *Unit 1: Management of Sporting Events | Tag: Very High** [1]*

Q2. Which of the following techniques is highly advanced and involves muscle contraction and relaxation to improve flexibility? (A) Ballistic method (B) Slow stretching (C) PNF (Proprioceptive Neuromuscular Facilitation) (D) Dynamic stretching *Unit 10: Training in Sports | Tag: Very High** [2]*

Q3. In the word 'Isometric', the term 'Iso' means constant and 'metric' means: (A) Tension (B) Force (C) Length (D) Contraction *Unit 10: Training in Sports | Tag: Very High** [3]*

Q4. Which of the following is an example of a macronutrient? (A) Vitamins (B) Minerals (C) Carbohydrates (D) Both A and B *Unit 5: Sports & Nutrition | Tag: High** [4]*

Q5. In the SAI Khelo India Fitness Test battery for girls (age 9-18 years), which specific test is used to measure upper body strength? (A) Standard Push-ups (B) Modified Push-ups (C) Pull-ups (D) Partial Curl-up *Unit 6: Test and Measurement in Sports | Tag: Very High** [5, 6]*

Q6. Which of the following types of friction is most relevant when a skater glides on an ice rink? (A) Static friction (B) Rolling friction (C) Sliding friction (D) Gliding friction *Unit 8: Biomechanics and Sports | Tag: High** [2, 7]*

Q7. According to the Big Five Theory of personality, a person who is creative, curious, and open to new ideas scores high on which trait? (A) Extroversion (B) Agreeableness (C) Conscientiousness (D) Openness *Unit 9: Psychology and Sports | Tag: High** [8]*

Q8. A sharp cut on the skin caused by a sharp object or equipment during sports is classified as a/an: (A) Laceration (B) Incision (C) Abrasion (D) Contusion *Unit 7: Physiology & Injuries in Sport | Tag: Medium** [7, 9]*

Q9. The menstrual disorder characterized by infrequent, irregular, or abnormally light menstrual periods in female athletes is known as: (A) Amenorrhea (B) Osteoporosis (C) Dysmenorrhea (D) Oligomenorrhea *Unit 2: Children & Women in Sports | Tag: Very High** [10]*

Q10. Which of the following yoga asanas is performed in a prone (lying on the stomach) position? (A) Makarasana (B) Halasana (C) Vajrasana (D) Tadasana *Unit 3: Yoga as Preventive Measure | Tag: High** [11]*

Q11. What is the formula to calculate the number of byes in the lower half if the total number of participating teams (N) is odd? (A) $(Nb - 1) / 2$ (B) $(Nb + 1) / 2$ (C) $(N + 1) / 2$ (D) $(N - 1) / 2$ *Unit 1: Management of Sporting Events | Tag: Very High** [12, 13]*

Q12. Vitamin D is critically important for the human body as it helps in the absorption of which mineral for healthy bones? (A) Iron (B) Potassium (C) Calcium (D) Sodium *Unit 5: Sports & Nutrition* | *Tag: Very High*** [14, 15]

Q13. The participants in the Special Olympics are exclusively: (A) Physically handicapped athletes (B) Veterans (C) Children and adults with intellectual disabilities (D) Deaf athletes *Unit 4: PE & Sports for CWSN* | *Tag: Very High*** [16]

Q14. What is the primary objective of performing the '4 x 10m Shuttle Run' test? (A) To measure speed and agility (B) To measure lower body strength (C) To measure cardiovascular endurance (D) To measure flexibility *Unit 6: Test and Measurement in Sports* | *Tag: High*** [17]

Q15. When a basketball player shoots a ball into the air toward the hoop, the path followed by the ball is called a: (A) Parabola (B) Velocity (C) Trajectory (D) Both A and C *Unit 8: Biomechanics and Sports* | *Tag: Very High*** [7]

Q16. Assertion (A): A sprain is a severe soft-tissue injury that occurs in the ligaments.

Reason (R): Ligaments connect bone to bone at a joint, and overstretching or tearing them due to a sudden twist causes a sprain. (A) Both (A) and (R) are true and (R) is the correct explanation of (A). (B) Both (A) and (R) are true, but (R) is not the correct explanation of (A). (C) (A) is true, but (R) is false. (D) (A) is false, but (R) is true. *Unit 7: Physiology & Injuries in Sport* | *Tag: Very High*** [9, 18]

Q17. Assertion (A): Consuming high amounts of simple carbohydrates provides a quick and immediate burst of energy to an athlete. **Reason (R):** Simple carbohydrates have a simple chemical structure and are broken down and digested very rapidly by the body. (A) Both (A) and (R) are true and (R) is the correct explanation of (A). (B) Both (A) and (R) are true, but (R) is not the correct explanation of (A). (C) (A) is true, but (R) is false. (D) (A) is false, but (R) is true. *Unit 5: Sports & Nutrition* | *Tag: High*** [19, 20]

Q18. Assertion (A): Extramural tournaments are highly effective in identifying and nurturing sporting talent at the state or national level. **Reason (R):** Extramural tournaments are restricted competitions that only allow students from the same school to compete against each other. (A) Both (A) and (R) are true and (R) is the correct explanation of (A). (B) Both (A) and (R) are true, but (R) is not the correct explanation of (A). (C) (A) is true, but (R) is false. (D) (A) is false, but (R) is true. *Unit 1: Management of Sporting Events* | *Tag: Medium*** [21, 22]

SECTION B: Very Short Answer Type (10 Marks: Attempt any 5 out of 6 x 2)

Word limit: 60-90 words.

Q19. Enumerate any two specific responsibilities of the 'Marketing Committee' during the organization of a mega sports event. *Unit 1: Management of Sporting Events* | *Tag: High*** [23, 24]

Q20. State any two health benefits of practicing *Nadi-Shodhana Pranayama*. *Unit 3: Yoga as Preventive Measure* | *Tag: Medium*** [11]

Q21. Define the term 'Food Intolerance' in the context of an athlete's diet. *Unit 5: Sports & Nutrition | Tag: Very High** [5, 25]*

Q22. What is the purpose of the 600m Run/Walk test in the SAI Khelo India battery, and what is the scoring procedure? *Unit 6: Test and Measurement in Sports | Tag: High** [5, 24]*

Q23. Briefly differentiate between 'Laceration' and 'Incision' as types of soft-tissue injuries. *Unit 7: Physiology & Injuries in Sport | Tag: Medium** [9, 26]*

Q24. Define the psychological concept of 'Self-Efficacy' in sports. *Unit 9: Psychology and Sports | Tag: High** [27]*

SECTION C: Short Answer Type (15 Marks: Attempt any 5 out of 6 x 3)

Word limit: 100-150 words.

Q25. Explain the procedure for calculating the total number of matches and the number of byes in a single knock-out tournament for 15 teams. *Unit 1: Management of Sporting Events | Tag: Very High** [28]*

Q26. Differentiate between *Oligomenorrhea* and *Primary Amenorrhea* as major menstrual dysfunctions faced by female athletes. *Unit 2: Children & Women in Sports | Tag: Very High** [3, 10]*

Q27. Detail any three key physiological factors that primarily determine the 'Endurance' of an athlete. *Unit 7: Physiology & Injuries in Sport | Tag: High** [9, 29]*

Q28. Elaborate on the principles of stability (such as broadening the base of support and lowering the centre of gravity) to maintain equilibrium in sports. *Unit 8: Biomechanics and Sports | Tag: Very High** [22, 30]*

Q29. Based on Carl Jung's classification of personality, write a comparative note on 'Introvert' and 'Extrovert' personality types. *Unit 9: Psychology and Sports | Tag: Very High** [30, 31]*

Q30. Describe the 'PNF' (Proprioceptive Neuromuscular Facilitation) technique. How is it executed to develop an athlete's flexibility? *Unit 10: Training in Sports | Tag: High** [2]*

SECTION D: Case-Study Based Questions (12 Marks: 3 x 4)

All 3 questions are compulsory. Internal choice is provided in one sub-part of each.

Q31. (Unit 6: Test and Measurement in Sports) During a primary school physical assessment camp, a PE teacher assesses children in the 5-8 years age group (Class 1-3) following the SAI Khelo India protocols. The teacher records their BMI and subsequently sets up a table with two yellow discs to measure their coordination and speed of upper limbs. Finally, he asks them to balance on one leg on a small wooden beam. **(i)** Which specific test is the teacher using to measure the speed and coordination of the children's upper limbs? **(ii)** The test where children balance on a wooden beam on a single leg is known as the __ Test. **(iii)** What physical fitness component does the test mentioned in question (ii) primarily

evaluate? **(iv)** Besides height, what other physical measurement must the teacher record to calculate the Body Mass Index (BMI)? **OR** In the Plate Tapping test, how many total taps must the child complete to record their timing? [5, 10]

Q32. (Unit 8: Biomechanics and Sports) During a specialized training camp, athletes are taught the application of Levers in the human body to optimize force and speed. The coach explains that whenever they perform a 'Bicep Curl' with a dumbbell, their elbow acts as the fulcrum, the bicep muscle provides the effort, and the dumbbell is the load. Later, he demonstrates a 'Calf Raise', showing how the ball of the foot acts as the fulcrum. **(i)** The human arm performing a 'Bicep Curl' is a classic mechanical example of a -class lever. **(ii)** In a second-class lever (like the Calf Raise), which component is situated strictly in the middle between the other two? **(iii)** A triceps extension, where the effort is applied opposite to the load across the elbow joint, operates as a -class lever. **(iv)** Define the term 'Fulcrum' in the context of sports biomechanics. **OR** Which class of lever is most predominantly found in the human body? [30, 32]

Q33. (Unit 5: Sports & Nutrition) A Class 12 student, Neha, starts experiencing extreme fatigue, shortness of breath, and pale skin during her athletic training. Her coach advises her parents to consult a doctor. The blood test reveals that her hemoglobin levels are critically low. The doctor advises a diet rich in a specific micro-mineral and Vitamin C to aid its absorption. **(i)** The severe deficiency of which specific mineral in Neha's diet has caused her low hemoglobin and anemia? **(ii)** What category of nutrients does the required mineral fall under (Macronutrient or Micronutrient)? **(iii)** Name any two rich food sources the doctor would recommend to cure Neha's deficiency. **(iv)** How does Vitamin C aid in this specific medical condition? **OR** Vitamins and minerals are scientifically termed as foods because they defend the body against diseases. [15, 33]

SECTION E: Long Answer Type (15 Marks: Attempt any 3 out of 4 x 5)

Word limit: 200-300 words.

Q34. What is a 'Combination Tournament'? Explain the situations where it is applied. Draw a neat fixture of 16 teams using the **Knock-out cum League** method, clearly showing the initial zonal stage and the final league stage. *Unit 1: Management of Sporting Events | Tag: High*** [28]

Q35. Define the term 'Asana'. Detail the step-by-step procedure, key health benefits, and any two contraindications (who should avoid it) of performing **Pawanmuktasana**. *Unit 3: Yoga as Preventive Measure | Tag: Very High*** [3, 25]

Q36. Define 'Coordinative Abilities' as a crucial component of sports training. Thoroughly elaborate on any four types of coordinative abilities (such as Orientation ability, Coupling ability, Reaction ability, Balance ability, etc.) giving relevant sports examples. *Unit 10: Training in Sports | Tag: Very High*** [34]

Q37. Bone injuries are extremely prevalent in contact sports. Define a 'Bone Fracture'. Comprehensively classify and explain the mechanics of any four types of bone fractures (e.g., Simple, Compound, Comminuted, Transverse, Greenstick, or Impacted fracture). *Unit 7: Physiology & Injuries in Sport | Tag: Very High*** [30, 31, 35]
