

CBSE 2027 Pe — Predicted Paper (Set 9 of 10)

SECTION A: Objective Type Questions (18 Marks: 18 x 1)

All questions are compulsory. Consists of MCQs and Assertion-Reason questions.

Q1. Which of the following is NOT a recognized method of drawing fixtures for a League tournament? (A) Cyclic Method (B) Staircase Method (C) Tabular Method (D) Pyramid Method
*Unit 1: Management of Sporting Events | Tag: Very High***

Q2. The headquarters of the International Paralympic Committee (IPC) is situated in: (A) Lausanne, Switzerland (B) Bonn, Germany (C) Athens, Greece (D) London, UK
*Unit 4: PE & Sports for CWSN | Tag: High***

Q3. In the context of the Female Athlete Triad, 'Anorexia Nervosa' is classified as a/an: (A) Bone density disorder (B) Menstrual dysfunction (C) Eating disorder (D) Postural deformity
*Unit 2: Children & Women in Sports | Tag: Very High***

Q4. The volume of air that is breathed in and out during a normal, quiet respiration is known as: (A) Vital Capacity (B) Tidal Volume (C) Residual Volume (D) Stroke Volume
*Unit 7: Physiology & Injuries in Sport | Tag: High***

Q5. Which specific cognitive disability severely affects a person's ability to read, spell, and comprehend language? (A) Dyslexia (B) Autism (C) Oppositional Defiant Disorder (D) ADHD
*Unit 4: PE & Sports for CWSN | Tag: Medium***

Q6. Which essential trace mineral is critically responsible for the proper functioning of the thyroid gland and the formation of the thyroxine hormone? (A) Iron (B) Calcium (C) Iodine (D) Phosphorus
*Unit 5: Sports & Nutrition | Tag: Very High***

Q7. In the Rikli & Jones Senior Citizen Fitness Test battery, what is the exact weight of the medicine ball/dumbbell used for men in the Arm Curl Test? (A) 4 lbs (B) 5 lbs (C) 8 lbs (D) 10 lbs
*Unit 6: Test and Measurement in Sports | Tag: High***

Q8. In sports biomechanics, the branch of study that deals with the forces that cause, modify, or stop motion is called: (A) Kinematics (B) Kinetics (C) Anatomy (D) Physiology
*Unit 8: Biomechanics and Sports | Tag: High***

Q9. According to the Big Five Theory of personality (OCEAN), a person who demonstrates high imagination, curiosity, creativity, and a preference for variety scores high on which trait? (A) Conscientiousness (B) Extraversion (C) Agreeableness (D) Openness
*Unit 9: Psychology and Sports | Tag: Very High***

Q10. The sports training cycle that typically lasts for a medium duration, ranging from 3 to 6 weeks, is termed as a: (A) Microcycle (B) Mesocycle (C) Macrocycle (D) Olympic cycle
*Unit 10: Training in Sports | Tag: Very High***

Q11. The term 'Dislocation' is associated with which specific category of sports injury? (A) Soft tissue injury (B) Skin injury (C) Muscle injury (D) Bone and Joint injury
Unit 7: Physiology &

*Injuries in Sport | Tag: Very High***

Q12. Which yoga asana is famously known as the 'Corpse Pose' and is universally used for deep relaxation and stress relief? (A) Makarasana (B) Shavasana (C) Tadasana (D) Bhujangasana

*Unit 3: Yoga as Preventive Measure | Tag: High***

Q13. A bicep curl exercise is a classic anatomical example of which class of lever in the human body? (A) First-class lever (B) Second-class lever (C) Third-class lever (D) None of the above

*Unit 8: Biomechanics and Sports | Tag: Very High***

Q14. The coordinative ability that enables a sportsperson to accurately determine and swiftly change the position of their body in space is known as: (A) Coupling ability (B) Orientation ability (C) Reaction ability (D) Differentiation ability

*Unit 10: Training in Sports | Tag: High***

Q15. According to the World Health Organization (WHO), what is the recommended minimum duration of moderate-intensity aerobic physical activity per week for healthy adults (18-64 years)? (A) 60 minutes (B) 100 minutes (C) 150 minutes (D) 300 minutes

*Unit 2: Children & Women in Sports | Tag: High***

Q16. Assertion (A): Vitamins and minerals are biologically categorized as protective foods.

Reason (R): They do not provide energy/calories, but they play a vital role in protecting the body against diseases and maintaining immunity. (A) Both (A) and (R) are true and (R) is the correct explanation of (A). (B) Both (A) and (R) are true, but (R) is not the correct explanation of (A). (C) (A) is true, but (R) is false. (D) (A) is false, but (R) is true. *Unit 5: Sports & Nutrition | Tag: Very High***

Q17. Assertion (A): Extrinsic motivation is always superior to intrinsic motivation for ensuring long-term adherence to a sport.

Reason (R): Cash prizes, medals, and external rewards provide an external drive to the athlete. (A) Both (A) and (R) are true and (R) is the correct explanation of (A). (B) Both (A) and (R) are true, but (R) is not the correct explanation of (A). (C) (A) is true, but (R) is false. (D) (A) is false, but (R) is true. *Unit 9: Psychology and Sports | Tag: Medium***

Q18. Assertion (A): Sliding friction is generally of a lesser magnitude than rolling friction.

Reason (R): Rolling objects have a smaller surface area in direct contact with the ground compared to sliding objects. (A) Both (A) and (R) are true and (R) is the correct explanation of (A). (B) Both (A) and (R) are true, but (R) is not the correct explanation of (A). (C) (A) is true, but (R) is false. (D) (A) is false, but (R) is true. *Unit 8: Biomechanics and Sports | Tag: High***

SECTION B: Very Short Answer Type (10 Marks: Attempt any 5 out of 6 x 2)

Word limit: 60-90 words.

Q19. What is a 'Seeding' method in tournament fixtures? Briefly explain its main objective.

*Unit 1: Management of Sporting Events | Tag: Very High***

Q20. Enlist any two health benefits and any two contraindications (who should avoid it) of performing *Sarala Matsyasana*.

*Unit 3: Yoga as Preventive Measure | Tag: Medium***

Q21. State any two specific roles of an Occupational Therapist in assisting Children with Special Needs (CWSN). *Unit 4: PE & Sports for CWSN | Tag: High***

Q22. Define Basal Metabolic Rate (BMR). Why is it significant in sports nutrition? *Unit 5: Sports & Nutrition | Tag: High***

Q23. Clearly differentiate between the terms 'Stroke Volume' and 'Cardiac Output' regarding the human heart. *Unit 7: Physiology & Injuries in Sport | Tag: Very High***

Q24. What is the 'Center of Gravity'? Briefly explain how it shifts when a gymnast raises their arms overhead. *Unit 8: Biomechanics and Sports | Tag: High***

SECTION C: Short Answer Type (15 Marks: Attempt any 5 out of 6 x 3)

Word limit: 100-150 words.

Q25. State the distinct functions of the 'Committee for Entries and Programmes' and the 'Announcement Committee' during a mega sporting event. *Unit 1: Management of Sporting Events | Tag: High***

Q26. Discuss the concepts of 'Menarche' and 'Menstrual Dysfunction'. How do severe athletic training and extreme dieting contribute to menstrual dysfunction in female athletes? *Unit 2: Children & Women in Sports | Tag: Very High***

Q27. Detail the purpose, required equipment, and administration procedure of the 'Arm Curl Test' from the Rikli & Jones fitness battery. *Unit 6: Test and Measurement in Sports | Tag: High***

Q28. What is the meaning of 'Goal Setting' in sports psychology? Expand the acronym 'SMART' used for effective goal setting. *Unit 9: Psychology and Sports | Tag: Very High***

Q29. Differentiate between 'Pace Runs' and 'Acceleration Sprints' as methods utilized for developing speed. *Unit 10: Training in Sports | Tag: High***

Q30. Human physiology alters as one gets older. Highlight any three major physiological changes that occur in the human body due to advancing age. *Unit 7: Physiology & Injuries in Sport | Tag: Very High***

SECTION D: Case-Study Based Questions (12 Marks: 3 x 4)

All 3 questions are compulsory. Internal choice is provided in one sub-part of each.

Q31. (Unit 8: Biomechanics and Sports) Riya, a dedicated track and field athlete, is practicing her shot-put throws. Her biomechanics coach analyzes her technique and instructs her to adjust her arm's trajectory. He tells her that to maximize the horizontal distance covered by the shot-put, she must release it at an optimal angle while maximizing her initial explosive force. **(i)** The parabolic path followed by the shot-put in the air after being released is scientifically known as a _____. **(ii)** Assuming the release height and landing height are perfectly level, what is the ideal mathematical angle of release for maximum horizontal distance? **(iii)** The branch of biomechanics that studies the shot-put's motion (velocity,

acceleration) without considering the actual muscular forces causing it is called? **(iv)** Name any one aerodynamic factor (other than gravity) that actively affects the trajectory of the projectile in the air. **OR** Which of Newton's laws is primarily demonstrated when Riya exerts maximum force to accelerate the heavy shot-put forward?

Q32. (Unit 5: Sports & Nutrition) Kabir, a school-level boxing champion, is desperately trying to drop a weight class for an upcoming tournament. To achieve this rapidly, he completely stops consuming carbohydrates, drastically cuts down his fluid intake, and spends hours in the sauna to sweat out water weight. During a sparring session, he feels severely dizzy, his muscles cramp, and he eventually faints. **(i)** What extremely dangerous weight-control practice is Kabir engaging in by sweating out fluids in a sauna? **(ii)** Carbohydrates, which Kabir completely eliminated, are an example of which broad category of nutrients? **(iii)** Based on his symptoms of fainting and dizziness, state one major 'Pitfall of Dieting' visible in this scenario. **(iv)** Instead of eliminating all carbs, Kabir should have included non-nutritive plant fibers in his diet to aid digestion without adding calories. What is this fiber called? **OR** What is the primary biological function of carbohydrates in a sportsperson's diet?

Q33. (Unit 4: PE & Sports for CWSN) In a mainstream public school, Rohan, a child diagnosed with Down Syndrome (an intellectual disability), is participating in a physical education class alongside his regular peers. To help Rohan navigate an obstacle course, the PE teacher replaces the standard dull-colored cones with brightly colored, oversized markers, and uses balls that have bells inside them to stimulate sensory tracking. **(i)** The educational model where CWSN like Rohan are educated and engage in physical activities in the exact same environment as mainstream students is called _____. **(ii)** What specific inclusive strategy is the PE teacher utilizing by changing the cones and using balls with bells? **(iii)** Name the global sports organization that organizes training and competitions strictly for individuals with intellectual disabilities like Down Syndrome. **(iv)** State any one psychological or social benefit Rohan will gain by participating in this inclusive obstacle course. **OR** Which medical professional should the school consult to help Rohan specifically improve his fine motor skills and daily living activities?

SECTION E: Long Answer Type (15 Marks: Attempt any 3 out of 4 x 5)

Word limit: 200-300 words.

Q34. Define the term 'Sports Training'. To achieve peak performance, training is systematically divided into distinct periods. Thoroughly discuss the concept of Training Cycles, clearly elaborating on the **Micro Cycle**, **Meso Cycle**, and **Macro Cycle**. *Unit 10: Training in Sports | Tag: Very High***

Q35. Physical activity is essential for healthy human development across the lifespan. Discuss in detail the Physical Exercise Guidelines recommended by the World Health Organization (WHO) for the age group of **5-17 years** and the age group of **18-64 years**. *Unit 2: Children & Women in Sports | Tag: High***

Q36. What is the purpose of the SAI Khelo India Fitness Test battery? Detail the specific test components prescribed for the **Age Group 5-8 years (Class 1 to 3)**. Explain the objective, equipment required, and administration procedure of the **Flamingo Balance Test** and the **Plate Tapping Test**. *Unit 6: Test and Measurement in Sports | Tag: Very High***

Q37. State Newton's Third Law of Motion (Law of Reaction). Thoroughly explain the practical application of this law in any **four** different sports/track events with appropriate, real-world examples. *Unit 8: Biomechanics and Sports | Tag: Very High***
