

CBSE 2027 Pe — Predicted Paper (Set 10 of 10)

SECTION A: Objective Type Questions (18 Marks: 18 x 1)

All questions are compulsory. Consists of MCQs and Assertion-Reason questions.

Q1. What is the formula to calculate the number of rounds in a League tournament using the Cyclic Method if the total number of participating teams (N) is even? (A) N (B) N + 1 (C) N - 1 (D) N(N - 1) *Unit 1: Management of Sporting Events | Tag: Very High***

Q2. In which of the following adaptive sports events are starter's guns and referee whistles replaced by visual cues like flags and flashing lights? (A) Special Olympics (B) Paralympics (C) Deaflympics (D) Commonwealth Games *Unit 4: PE & Sports for CWSN | Tag: Very High***

Q3. A menstrual disorder characterized by severe, cramp-like pain in the lower abdomen during menstruation is known as: (A) Amenorrhea (B) Dysmenorrhea (C) Menarche (D) Osteoporosis *Unit 2: Children & Women in Sports | Tag: High***

Q4. Which of the following vitamins is absolutely essential for the coagulation (clotting) of blood? (A) Vitamin A (B) Vitamin C (C) Vitamin K (D) Vitamin E *Unit 5: Sports & Nutrition | Tag: Very High***

Q5. In the Rikli & Jones Senior Citizen Fitness Test, the 'Back Scratch Test' is administered to measure: (A) Lower body flexibility (B) Upper body flexibility (C) Core strength (D) Agility *Unit 6: Test and Measurement in Sports | Tag: Very High***

Q6. The physiological process where the size and cross-sectional area of muscle fibers increase due to regular, intense resistance training is called: (A) Muscular Atrophy (B) Muscular Hypertrophy (C) Stroke Volume (D) Cardiac Output *Unit 7: Physiology & Injuries in Sport | Tag: Very High***

Q7. According to the principles of biomechanics and stability, the lower the Centre of Gravity of an athlete's body, the ____ is their stability. (A) Lower (B) Higher (Greater) (C) More unstable (D) It has no effect *Unit 8: Biomechanics and Sports | Tag: High***

Q8. The psychological technique in sports where an athlete uses all their senses to create or recreate an experience of a successful performance in their mind is called: (A) Goal Setting (B) Self-Esteem (C) Mental Imagery (D) Assertiveness *Unit 9: Psychology and Sports | Tag: High***

Q9. The principle of sports training which states that 'to improve fitness, the training load must be gradually and progressively increased over time' is known as: (A) Principle of Specificity (B) Principle of Reversibility (C) Principle of Overload (Progression) (D) Principle of Individual Differences *Unit 10: Training in Sports | Tag: Very High***

Q10. Which of the following asanas is highly recommended for the treatment of back pain and translates to the "Camel Pose"? (A) Ushtrasana (B) Vakrasana (C) Shalabhasana (D) Tadasana *Unit 3: Yoga as Preventive Measure | Tag: High***

- Q11 नाइट** (Night blindness) is a medical condition primarily caused by the severe deficiency of: (A) Vitamin C (B) Vitamin A (C) Iron (D) Calcium *Unit 5: Sports & Nutrition | Tag: High***
- Q12.** A soft tissue injury caused by a blunt force or severe blow to the body, resulting in bleeding under the skin (a bruise) without breaking the skin, is called a/an: (A) Strain (B) Sprain (C) Contusion (D) Abrasion *Unit 7: Physiology & Injuries in Sport | Tag: Very High***
- Q13.** During a sports tournament, which specific committee is responsible for arranging trophies, medals, and certificates for the winners? (A) Logistics Committee (B) Technical Committee (C) Decoration and Ceremony Committee (D) Marketing Committee *Unit 1: Management of Sporting Events | Tag: Medium***
- Q14.** The invisible force that constantly pulls a projectile (like a javelin or a high jumper) back down towards the earth's surface is: (A) Air Resistance (B) Friction (C) Gravity (D) Centrifugal force *Unit 8: Biomechanics and Sports | Tag: Very High***
- Q15.** Gösta Holmér, a Swedish coach, is credited with developing which of the following training methods? (A) Circuit Training (B) Fartlek Training (C) Interval Training (D) Isokinetic Training *Unit 10: Training in Sports | Tag: High***
- Q16. Assertion (A):** Autism Spectrum Disorder (ASD) heavily affects an individual's ability to communicate, socialize, and interact with others. **Reason (R):** ASD is a complex neurological and developmental disorder that begins in early childhood. (A) Both (A) and (R) are true and (R) is the correct explanation of (A). (B) Both (A) and (R) are true, but (R) is not the correct explanation of (A). (C) (A) is true, but (R) is false. (D) (A) is false, but (R) is true. *Unit 4: PE & Sports for CWSN | Tag: Very High***
- Q17. Assertion (A):** Body Mass Index (BMI) is widely used by physical education teachers to measure an athlete's cardiovascular endurance. **Reason (R):** BMI is a statistical value calculated using an individual's height and weight to categorize their body weight (e.g., normal, overweight, obese). (A) Both (A) and (R) are true and (R) is the correct explanation of (A). (B) Both (A) and (R) are true, but (R) is not the correct explanation of (A). (C) (A) is true, but (R) is false. (D) (A) is false, but (R) is true. *Unit 5: Sports & Nutrition | Tag: High***
- Q18. Assertion (A):** Women's participation in professional sports in India has historically been lower than men's. **Reason (R):** Lack of safe sports infrastructure, societal stereotypes, and poor media coverage act as major hurdles for female athletes. (A) Both (A) and (R) are true and (R) is the correct explanation of (A). (B) Both (A) and (R) are true, but (R) is not the correct explanation of (A). (C) (A) is true, but (R) is false. (D) (A) is false, but (R) is true. *Unit 2: Children & Women in Sports | Tag: Very High***
-

SECTION B: Very Short Answer Type (10 Marks: Attempt any 5 out of 6 x 2)

Word limit: 60-90 words.

- Q19.** Write down any two primary objectives of 'Planning' in sports events. *Unit 1: Management of Sporting Events | Tag: High***

- Q20.** Define 'Dysmenorrhea'. Mention any one strategy or remedy a female athlete can use to manage it during training. *Unit 2: Children & Women in Sports | Tag: Medium***
- Q21.** What are Vitamins? Briefly differentiate between fat-soluble and water-soluble vitamins. *Unit 5: Sports & Nutrition | Tag: Very High***
- Q22.** Mention any two immediate first-aid steps that should be taken for managing a 'Contusion' (bruise) on the sports field. *Unit 7: Physiology & Injuries in Sport | Tag: High***
- Q23.** Distinguish briefly between 'Instrumental Aggression' and 'Assertive Behavior' in sports. *Unit 9: Psychology and Sports | Tag: Medium***
- Q24.** State the 'Principle of Specificity' in sports training. *Unit 10: Training in Sports | Tag: Very High***
-

SECTION C: Short Answer Type (15 Marks: Attempt any 5 out of 6 x 3)

Word limit: 100-150 words.

- Q25.** Differentiate between Knock-out Tournaments and League Tournaments by providing any three distinct points of comparison. *Unit 1: Management of Sporting Events | Tag: Very High***
- Q26.** Aggression is common in competitive sports. Discuss any three psychological causes that lead to aggression in athletes. *Unit 9: Psychology and Sports | Tag: High***
- Q27.** To create an inclusive environment for CWSN, different professionals are required. Briefly explain the specific roles of a 'Speech Therapist' and a 'Special Educator'. *Unit 4: PE & Sports for CWSN | Tag: High***
- Q28.** Detail the specific equipment required and the correct administration procedure of the 'Push-Ups (for boys)' test under the SAI Khelo India protocol. *Unit 6: Test and Measurement in Sports | Tag: Very High***
- Q29.** Explain the concepts of 'Air Resistance' and 'Gravity' as crucial aerodynamic and physical factors affecting the trajectory of a projectile. *Unit 8: Biomechanics and Sports | Tag: Very High***
- Q30.** What do you understand by 'Talent Identification' and 'Talent Development' in sports? Why are these processes critical for a country's sporting success? *Unit 10: Training in Sports | Tag: Medium***
-

SECTION D: Case-Study Based Questions (12 Marks: 3 x 4)

All 3 questions are compulsory. Internal choice is provided in one sub-part of each.

- Q31. (Unit 1: Management of Sporting Events)** A school is hosting a District level Basketball Tournament on a Knock-out basis. A total of 12 teams have registered for the competition. The organizing committee is busy preparing the fixture and calculating the number of byes,

as 12 is not a power of 2. **(i)** Since 12 is not a power of 2, how many total 'Byes' will be given in this fixture? **(ii)** How many total matches will be played in this tournament before a champion is declared? **(iii)** How many rounds will be played in this tournament? **(iv)** In which half (Upper or Lower) will the greater number of byes be allocated? **OR** What is the exact formula used to calculate the number of byes in a knock-out fixture?

Q32. (Unit 2: Children & Women in Sports) During a posture-check camp, a physical education teacher notices that several girls in Class 11 have an exaggerated inward curvature of the lower spine (lumbar region), which causes their stomach to protrude forward. Many of them complain of severe lower back pain after standing for long periods. **(i)** Identify the specific spinal postural deformity the girls are suffering from. **(ii)** Name the postural deformity that is the exact opposite of this condition (characterized by an outward curve/hunchback). **(iii)** Suggest any one corrective physical exercise or yoga asana that the teacher should recommend to treat this specific lower back condition. **(iv)** Mention one major cause of this specific deformity. **OR** Name the spinal deformity where the spine bends laterally (sideways), forming a "C" or "S" shape.

Q33. (Unit 7: Physiology & Injuries in Sport) During a high-stakes marathon on a hot summer day, a lead runner suddenly stops, clutching his calf muscle in agony. He is sweating profusely and his muscle feels extremely tight, contracted, and hard. The medical team rushes in and realizes he has suffered a severe muscle cramp due to extreme dehydration and loss of electrolytes. **(i)** What is the most likely immediate cause of the muscle cramp in this specific scenario? **(ii)** A muscle cramp is classified under which broad category of sports injuries (Bone, Joint, or Soft Tissue)? **(iii)** What immediate first-aid treatment should the medical team apply to relieve the contracted calf muscle? **(iv)** The severe deficiency of which specific macro-minerals (electrolytes) through sweat often leads to cramps? **OR** The accumulation of which specific acid in the muscles during intense anaerobic exercise causes severe muscle fatigue and pain?

SECTION E: Long Answer Type (15 Marks: Attempt any 3 out of 4 x 5)

Word limit: 200-300 words.

Q34. What is Back Pain? Enlist any four yoga asanas recommended in the syllabus for the prevention and management of back pain. Thoroughly describe the step-by-step procedure, two health benefits, and two contraindications of **Bhadrāsana**. *Unit 3: Yoga as Preventive Measure | Tag: Very High***

Q35. The dietary requirements of an athlete change drastically before, during, and after an event. Explain in detail the **Pre-competition, During-competition, and Post-competition** dietary strategies and nutrient requirements for an endurance athlete to ensure peak performance and recovery. *Unit 5: Sports & Nutrition | Tag: High***

Q36. Define 'Friction'. Distinguish clearly between Static Friction, Sliding Friction, and Rolling Friction. Furthermore, elaborate on the specific methods used to purposefully **increase** and

decrease friction in various sports, providing real-world examples. *Unit 8: Biomechanics and Sports* | Tag: Very High**

Q37. What do you understand by the term 'Personality'? Explain Carl Jung's classification of personality types (**Introvert, Extrovert, and Ambivert**) in detail, highlighting how each personality type behaves and adapts in a sporting environment. *Unit 9: Psychology and Sports* | Tag: Very High**
