

CBSE Class 12 Pe — Psychology and Sports

50 Most-Probable PYQs & Board-Pattern Practice Questions

1-Mark (MCQ/Assertion-Reason/VSA)

Q1. Reactive aggression is also called ___. (A) Instrumental aggression (B) Hostile aggression (C) Assertive aggression (D) Both (A) and (B) [PYQ] | Confidence: Very High

Q2. Self-talk refers to our ____ consisting of statements we say to ourselves, either in our mind or out loud. (A) Internal thoughts (B) Internal behavior (C) Internal soul (D) Internal emotions [PYQ 2025] | Confidence: High

Q3. Given below are two statements labeled Assertion (A) and Reason (R): Assertion (A): Actions and responses of two athletes may differ during a match situation. Reason (R): Personality is the combination of an individual's thoughts, characteristics, behaviour, attitude and habits. (A) Both (A) and (R) are true and (R) is the correct explanation of (A). (B) Both (A) and (R) are true, but (R) is not the correct explanation of (A). (C) (A) is true, but (R) is false. (D) (A) is false, but (R) is true. [PYQ 2024] | Confidence: Very High

Q4. Given below are two statements labeled Assertion (A) and Reason (R): Assertion (A): Aggression is a part of human behavior and is necessary for an individual to live and struggle for higher achievements. Reason (R): Aggression is inevitable and inseparable in sport activities. (A) Both (A) and (R) are true and (R) is the correct explanation of (A). (B) Both (A) and (R) are true, but (R) is not the correct explanation of (A). (C) (A) is true, but (R) is false. (D) (A) is false, but (R) is true. [PYQ 2025] | Confidence: High

Q5. Shweta is over-stressed and anxious as she is preparing for her 'NEET' exam. Which of the following is a suitable reason for her to exercise? (A) To develop physical strength (B) Mental Relaxation (C) For Socialisation (D) To reduce the risk of disease [PYQ 2024] | Confidence: High

Q6. Match the traits of the Big Five theories of personality in List-I with their characteristics in List-II: List-I (Traits) (a) Openness (b) Extroversion (c) Neuroticism (d) Agreeableness List-II (Characteristics) i. Active, optimistic and social ii. Insecure, nervous and anxious iii. Creative, curious and imaginative iv. Friendly, helpful and trustworthy (A) a-iii, b-i, c-ii, d-iv (B) a-iii, b-ii, c-i, d-iv (C) a-i, b-ii, c-iii, d-iv (D) a-iv, b-iii, c-ii, d-i [PYQ 2024] | Confidence: Very High

Q7. According to Carl Jung's classification of personality, individuals who are shy, socially withdrawn, and prefer to work alone are known as: (A) Extroverts (B) Introverts (C) Ambiverts (D) Mesomorphs [Practice] | Confidence: Very High

Q8. A person having a balanced combination of both introvert and extrovert traits is known as a/an: (A) Mesomorph (B) Endomorph (C) Ambivert (D) Ectomorph [PYQ 2024] | Confidence: Very High

Q9. According to Ogburn and Nimkoff, "The totality of sentiments, attitude, idea, habits, skills and behaviours of an individual" is the definition of: (A) Motivation (B) Aggression (C) Personality (D) Anxiety [Practice] | Confidence: High

Q10. The inner drive or desire within an individual that guides them to perform better and participate in sports for the sheer joy of it is called: (A) Extrinsic Motivation (B) Intrinsic Motivation (C) Instrumental Aggression (D) Self-talk [Practice] | Confidence: Very High

Q11. Praise, blame, cash prizes, and trophies are examples of: (A) Intrinsic Motivation (B) Extrinsic Motivation (C) Psychological stress (D) Assertive behavior [Practice] | Confidence: High

Q12. In sports, when a player's primary goal is to achieve victory or a reward, and harm caused to the opponent is accidental or a byproduct of the play, it is known as: (A) Hostile Aggression (B) Instrumental Aggression (C) Reactive Aggression (D) Self-esteem [Practice] | Confidence: Very High

Q13. Which of the following Big Five personality traits is characterized by a person being highly organized, dependable, and goal-oriented? (A) Openness (B) Agreeableness (C) Conscientiousness (D) Neuroticism [Practice] | Confidence: Very High

Q14. A disturbed state of the body and mind accompanied by nervousness, restlessness, and increased heart rate before a major competition is termed as: (A) Aggression (B) Motivation (C) Anxiety (D) Mental Imagery [PYQ] | Confidence: High

Q15. The psychological technique where an athlete creates or recreates a positive sensory experience of a successful performance in their mind is called: (A) Mental Imagery (B) Goal Setting (C) Extrinsic Motivation (D) Somatic adjustment [Practice] | Confidence: High

Q16. Which branch of applied psychology deals with sports performance and the behavior of a player during training and competitive situations? (A) Clinical Psychology (B) Sports Psychology (C) Cognitive Psychology (D) Developmental Psychology [PYQ] | Confidence: Very High

Q17. Individuals displaying high levels of emotional instability, mood swings, and negative emotions score high on which Big Five trait? (A) Extroversion (B) Neuroticism (C) Openness (D) Agreeableness [PYQ 2024] | Confidence: High

Q18. A deliberate action performed in sports using legitimate physical force with no intention to harm the opponent, strictly within the rules of the game, is called: (A) Hostile Aggression (B) Reactive Aggression (C) Assertive Behavior (D) Instrumental Aggression [Practice] | Confidence: Medium

Q19. Taking help of a sports psychologist to overcome a performance slump is an example of which kind of motivation/support? (A) Intrinsic Motivation (B) Extrinsic Motivation (C) Ambivert trait (D) Instrumental Aggression [PYQ 2024] | Confidence: Medium

Q20. Define 'Motivation' in one sentence. [PYQ] | Confidence: Very High

2-Mark

- Q21.** Define sports psychology. [PYQ] | Confidence: Very High
- Q22.** Enumerate four advantages of athletes engaging in self-talk during sports. [PYQ] | Confidence: Very High
- Q23.** What do you understand by the term 'Goal Setting' in sports? [PYQ] | Confidence: Very High
- Q24.** Define intrinsic motivation with a suitable example. [PYQ] | Confidence: High
- Q25.** Briefly differentiate between Hostile Aggression and Instrumental Aggression. [Practice] | Confidence: Very High
- Q26.** State any two effective techniques of motivation used by coaches. [PYQ] | Confidence: High
- Q27.** What is anxiety in sports? Mention any two of its physiological symptoms. [PYQ] | Confidence: High
- Q28.** What are 'Coping Strategies' in sports psychology? Name the two main types of coping. [PYQ] | Confidence: High
- Q29.** Define 'Personality'. [PYQ] | Confidence: Very High
- Q30.** What is 'Assertive Behavior' in sports? Give one example. [Practice] | Confidence: Medium
- Q31.** How can extrinsic motivation sometimes kill intrinsic motivation? [PYQ] | Confidence: Medium
- Q32.** Define 'Stress'. How does it affect an athlete's performance? [PYQ] | Confidence: High
-

3-Mark

- Q33.** Compare and contrast Hostile Aggression and Instrumental Aggression with suitable examples from sports. [PYQ] | Confidence: Very High
- Q34.** Explain Carl Jung's classification of personality. [PYQ] | Confidence: Very High
- Q35.** Explain any three techniques of motivation for higher achievement in sports. [PYQ] | Confidence: Very High
- Q36.** Discuss Sheldon's classification of personality (body types) in detail. [PYQ] | Confidence: High
- Q37.** Elaborate on any three components of the 'Big Five Theory' of personality. [PYQ] | Confidence: Very High
- Q38.** What is the importance of sports psychology in the field of physical education and sports? Explain any three points. [PYQ] | Confidence: High

- Q39.** Explain the coping strategies (Problem-focused and Emotion-focused) used by athletes to manage stress. [PYQ] | Confidence: High
- Q40.** How can we enhance sports performance with the help of 'Self-talk' and 'Self-esteem'? [PYQ 2024] | Confidence: Medium
- Q41.** Explain 'Goal Setting' as a technique of motivation in brief. [PYQ] | Confidence: High
- Q42.** Discuss the causes and symptoms of anxiety in sports. [PYQ] | Confidence: Medium
-

5-Mark (Long Answer/Case-Study)

- Q43.** Describe personality. Explain the dimensions of personality based on the "Big Five Theory" (OCEAN) in detail. [PYQ] | Confidence: Very High
- Q44.** What is meant by motivation? Explain the different techniques of motivation for higher achievement in sports. [PYQ] | Confidence: Very High
- Q45.** Define sports psychology and elucidate its importance in the field of sports for athletes and coaches. [PYQ] | Confidence: High
- Q46.** Make a table explaining any three personalities from the Big Five theory and outline their specific characteristics. [PYQ] | Confidence: High
- Q47. Case Study:** Vijay is a football player of Kennedy school. He is famous for his aggressive play in the field. Because of his aggression, he scored many goals. At the same time, he was punished for his aggressive behaviour with opponents. (i) What level of aggression is genuinely needed in sports for better performance? (A) Partially (B) Fully (C) No need (D) None of these (ii) Hostile aggression is also known as ___ aggression. (iii) The type of aggression where the main aim is to win the match without the primary intention to harm is called? (iv) Using legitimate physical force strictly within the rules of the game is termed as? [PYQ 2024] | Confidence: Very High
- Q48. Case Study:** Rohan was a good athlete in our school. He used to undergo training regularly for the best results. In spite of his constant effort, he could not succeed. He got frustrated with his poor performance and stopped expressing his feelings and meeting friends. His parents took him to a psychologist for help. After a few consultations, he was able to focus well and succeeded. (i) Rohan can be motivated initially by using: (A) Blame (B) Praise (C) Ignorance (D) Punishment. (ii) Taking help from a psychologist becomes what kind of motivation? (A) Intrinsic (B) Extrinsic (C) Ambivert (D) Internal. (iii) A person with emotional instability and negative emotions is termed as having which trait? (iv) A person having both traits of introvert and extrovert is known as? [PYQ 2024] | Confidence: Very High
- Q49. Assertion (A):** Actions and responses of two athletes may differ during a match situation. **Reason (R):** Personality is the combination of an individual's thoughts, characteristics, behavior, attitude, and habits. In the context of the above statements, thoroughly explain Carl Jung's classification of personality (Introverts, Extroverts, Ambiverts)

and how each type responds differently in competitive sports environments. [PYQ 2024] | Confidence: High

Q50. Define 'Stress' and 'Anxiety' in the context of competitive sports. Detail the various psychological strategies and relaxation techniques (such as mental imagery, self-talk, and goal setting) an athlete can use to manage pre-competition stress and anxiety. [Practice] | Confidence: Very High

Answer Key

Q1. (B) Hostile aggression **Q2.** (A) Internal thoughts **Q3.** (A) Both (A) and (R) are true and (R) is the correct explanation of (A). **Q4.** (B) Both (A) and (R) are true, but (R) is not the correct explanation of (A). **Q5.** (B) Mental Relaxation **Q6.** (A) a-iii, b-i, c-ii, d-iv **Q7.** (B) Introverts **Q8.** (C) Ambivert **Q9.** (C) Personality **Q10.** (B) Intrinsic Motivation **Q11.** (B) Extrinsic Motivation **Q12.** (B) Instrumental Aggression **Q13.** (C) Conscientiousness **Q14.** (C) Anxiety **Q15.** (A) Mental Imagery **Q16.** (B) Sports Psychology **Q17.** (B) Neuroticism **Q18.** (C) Assertive Behavior **Q19.** (B) Extrinsic Motivation **Q20.** Motivation is an inner drive or psychological force that directs and energizes an individual's behavior toward achieving a specific goal. **Q21.** Sports psychology is the branch of applied psychology which deals with the behavior, mental processes, and performance of players during training and competitive situations. **Q22.** 1. Enhances focus and concentration. 2. Builds self-confidence and self-efficacy. 3. Regulates arousal and reduces anxiety. 4. Helps in executing motor skills by mentally repeating cues. **Q23.** Goal setting is a mental training technique involving the establishment of specific, measurable, achievable, relevant, and time-bound (SMART) targets to improve an athlete's performance and motivation. **Q24.** Intrinsic motivation is an internal drive to participate or perform for the sheer joy, satisfaction, and personal growth it brings. Example: A boy playing basketball just because he loves the sport. **Q25.** Hostile aggression has the primary intent to cause physical or psychological harm to the opponent. Instrumental aggression has the primary intent to achieve a goal (like winning the ball), and any harm caused is a secondary byproduct. **Q26.** 1. Goal Setting. 2. Positive Reinforcement (Praise/Rewards). **Q27.** Anxiety is a state of uneasiness, apprehension, and fear regarding future outcomes. Symptoms: Increased heart rate, excessive sweating, and dry mouth. **Q28.** Coping strategies are cognitive and behavioral efforts made to master, reduce, or tolerate stress. Types: 1. Problem-focused coping. 2. Emotion-focused coping. **Q29.** Personality is the dynamic organization within the individual of those psychophysical systems that determine their unique adjustments to their environment (thoughts, behaviors, habits). **Q30.** Assertive behavior involves playing with high intensity and using legitimate physical force strictly within the rules of the game without any intention to harm. Example: A hard but fair legal tackle in football. **Q31.** Over-reliance on external rewards (cash, medals) can shift the athlete's focus away from the joy of the sport. Once the external rewards are removed, the athlete may no longer feel the internal desire (intrinsic motivation) to play. **Q32.** Stress is the body's physical, mental, or emotional response to a demanding situation. High levels of stress disrupt homeostasis, increase muscle tension, cloud decision-

making, and negatively affect athletic performance. **Q33. Hostile Aggression:** The main objective is to intentionally injure the opponent (e.g., intentionally punching a player out of anger). It violates the rules. **Instrumental Aggression:** The primary objective is to gain a tactical advantage or win, and harm is a byproduct (e.g., a hard tactical foul in football to stop a goal). **Q34.** Carl Jung classified personality into three types: 1. **Introverts:** Shy, reserved, prefer solitude, think deeply before acting. 2. **Extroverts:** Social, outgoing, expressive, action-oriented, enjoy being the center of attention. 3. **Ambiverts:** Possess a balanced mixture of both introverted and extroverted traits depending on the situation. **Q35.** 1. **Goal Setting:** Setting SMART goals gives athletes clear targets to work towards. 2. **Rewards and Reinforcements:** Medals, certificates, and cash prizes boost the desire to win. 3. **Praise and Blame:** Constructive praise boosts confidence, while calculated blame can push an underperforming athlete to try harder. **Q36.** Sheldon classified personalities based on body types: 1. **Endomorphs:** Round, soft, high body fat, sociable and relaxed. 2. **Mesomorphs:** Muscular, broad shoulders, athletic build, adventurous and competitive (ideal for most sports). 3. **Ectomorphs:** Tall, thin, lean muscles, introverted and self-conscious (suited for endurance/jumping sports). **Q37.** 1. **Openness:** Characteristics include being curious, creative, imaginative, and open to new ideas/training methods. 2. **Conscientiousness:** Highly organized, disciplined, dependable, and goal-oriented (excellent for sticking to training routines). 3. **Extroversion:** Sociable, energetic, enthusiastic, and highly interactive (great team players). **Q38.** 1. **Enhances Performance:** Helps athletes control anxiety and focus better under pressure. 2. **Modifies Behavior:** Helps in managing aggression and developing sportsmanship. 3. **Talent Identification:** Identifies specific psychological traits suited for specific sports (e.g., concentration for shooting). **Q39. Problem-Focused Coping:** Taking direct action to alter the stressful situation (e.g., analyzing opponent weaknesses, improving skills through extra practice). **Emotion-Focused Coping:** Regulating the emotional distress associated with the situation (e.g., using meditation, deep breathing, or listening to music to calm nerves). **Q40. Self-talk** helps an athlete stay focused, corrects bad habits by repeating technical cues (e.g., "keep your eye on the ball"), and wards off negative thoughts. **Self-esteem** builds unshakeable self-confidence, ensuring the athlete believes in their capacity to succeed, reducing pre-match anxiety and leading to peak performance. **Q41.** Goal setting involves establishing specific, measurable, achievable, realistic, and time-bound (SMART) objectives. It provides direction, mobilizes effort, and fosters persistence. Long-term goals (winning a medal) are broken down into short-term goals (daily training targets) to maintain high motivation levels. **Q42. Causes:** Fear of failure, high expectations from parents/coaches, lack of preparation, fear of injury, and crowd pressure. **Symptoms:** Nervousness, restlessness, increased heart rate, shallow breathing, sweating, negative thoughts, and lack of concentration. **Q43.** Personality is the sum total of an individual's physical, mental, emotional, and social characteristics. Big Five (OCEAN): 1. **Openness** (imaginative/curious), 2. **Conscientiousness** (organized/disciplined), 3. **Extroversion** (sociable/outgoing), 4. **Agreeableness** (cooperative/trustworthy), 5. **Neuroticism** (anxious/emotionally unstable). **Q44.** Motivation is the inner drive that directs behavior toward goals. Techniques: 1. Goal setting (short/long term). 2. Praise and feedback. 3. Spectator support/crowd cheering. 4.

Cash prizes and awards (Extrinsic). 5. Motivational music/speeches. 6. Ensuring a positive and safe training environment. **Q45.** Sports psychology applies psychological principles to sports. Importance: 1. Understanding athlete behavior. 2. Enhancing physiological capacities through mental conditioning. 3. Managing stress, anxiety, and performance pressure. 4. Building team cohesion and leadership. 5. Helping athletes mentally recover from severe injuries. **Q46.** | Trait | Characteristics | | :--- | :--- | | **Extroversion** | Highly sociable, expressive, energetic, action-oriented, enjoys attention. | | **Conscientiousness** | Highly disciplined, organized, dependable, focused, and goal-oriented. | | **Agreeableness** | Cooperative, friendly, empathetic, team-oriented, and trustworthy. | **Q47.** (i) (A) Partially (Controlled/Assertive). (ii) Reactive aggression. (iii) Instrumental Aggression. (iv) Assertive Behavior. **Q48.** (i) (B) Praise. (ii) (B) Extrinsic. (iii) Neuroticism. (iv) Ambivert. **Q49.** Introverts are reserved, focus internally, and thrive in individual sports requiring high concentration (e.g., archery, chess). Extroverts are highly social, action-oriented, thrive under crowd pressure, and excel in fast-paced team sports (e.g., football, basketball). Ambiverts balance both traits, easily adapting to solitary training and team environments. Because of these distinct personalities (Reason R), two athletes will react differently to the same high-pressure match situation (Assertion A). **Q50.** **Stress** is the body's response to demands, while **Anxiety** is the feeling of fear/apprehension about the outcome. **Strategies:** 1. *Mental Imagery (Visualization)*: Picturing successful execution of a skill. 2. *Self-Talk*: Using positive affirmations ("I can do this"). 3. *Goal Setting*: Focusing on process goals rather than outcome. 4. *Relaxation techniques*: Deep breathing, progressive muscle relaxation, or meditation to lower heart rate and calm the nervous system.

CBSE Class 12 (2027) — Chapterwise PYQ Bank. Compiled from past board papers + board-pattern practice questions (clearly labelled).
